Mradul Garg

Full Stack Web Developer

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with a keen expertise in the MERN stack, adept at crafting scalable server-side APIs and dynamic front-end interfaces. Excellent problem-solving and collaboration skills, enhanced by proficiency in Generative AI and swift adaptability to new technologies.

WORK EXPERIENCE

Neoscript Technologies

Software Engineer  
November 2023-present

Job responsibilities:

- Implemented and maintained frontend components of web applications using React.js to ensure seamless integration with backend components.
- Designed and developed efficient server-side APIs using Node.js and Express.js, adhering to project requirements and scalability needs.

EUONUS IT

Web Development  
July 2022 - July 2023

Job responsibilities:

- Collaborated with a team of developers to create user-friendly web interfaces using HTML, CSS, and WordPress, enhancing overall user experience and project completion efficiency.

PROJECTS

1. Reliance Digital Clone | |

Localstorage | HTML5 | CSS3 | JavaScript | Git

- Designed and implemented a visually appealing home page and navigation bar to mirror Reliance Digital's layout and improve user experience.
- Developed an interactive slider to dynamically display featured products and promotions, enhancing user engagement.

2. Nordstromrack Clone | |

React | Git | Localstorage | Chakra UI

- Developed dynamic frontend components using React and Chakra UI for enhanced user interface and experience.
- Implemented secure authentication and proper routing to ensure seamless navigation across the site.
- Utilized LocalStorage to maintain user sessions and ensure a personalized shopping experience.

3. Notebook Server |

Node.js | Express.js | MongoDB | RESTful APIs

- Implemented user registration functionality using Node.js and Express.js, allowing new users to create accounts.
- Utilized JSON Web Tokens (JWT) for secure authentication and authorization, ensuring restricted access to protected routes.
- Integrated MongoDB Atlas for scalable and reliable data storage, ensuring seamless connection and data management.
