Ojas Chikara

Full Stack Web Developer

Professional Summary

Driven Full Stack Web Developer with expertise in JavaScript, MERN stack, and RESTful API design. Strong problem-solving and collaboration skills ensure seamless project integration and high-quality, scalable web applications. Quick to adapt and proficient in using Generative AI and learning new technologies swiftly.

Projects

Bella Vita   Live Demo Link   Github Repo Link

JavaScript   Git   HTML5   CSS3

Responsive Web Design

- Collaborated with a team of three developers to create a responsive web design that adapts seamlessly to various devices.
- Developed product listing pages with filtering options, enhancing the user experience for easy product navigation.

Sugar Cosmetics   Live Demo Link   Github Repo Link

JavaScript   git   HTML5   CSS3   React

Responsive Web Design

- Developed a sleek and modern e-commerce application showcasing a variety of beauty and cosmetic products using React.
- Designed a fully responsive interface ensuring consistent user interaction across desktops, tablets, and smartphones.

Bleufly project   Live Demo Link   Github Repo Link

JavaScript   HTML5   CSS3

Responsive Web Design   Git

- Collaborated with designers to replicate the key features and layout of the Bluefly website, ensuring a visually appealing and functionally similar user experience.
- Developed product browsing functionality, allowing users to view, search, and filter products by category.
